

MODEL 3563 DISMANTLING JOINT

- Labor/time savings; no need to weld or fabricate components to pipe.
- Cost effective when compared to harnessed mechanical coupling systems.
- Laying lengths are offered in both stock and custom sizes to meet your specific requirements.
- Shorter runs because of self-contained design.
- Longitudinal adjustment feature eliminates pipeline fit up problems.
- Reduces maintenance costs of in-line pipe systems.
- NSF 61 approved fusion bonded epoxy eliminates corrosion.
- Consult with customer service on this products.
