

Features and Benefits

- 1. Allows use of MJ gate valve, reduces valve inventory and therefore, creates cost savings on valves.
- 2. The complete tapping sleeve is constructed of 316 Stainless Steel and shall be passivated so as to return the welded stainless steel to its original corrosion resistant state.
- 3. Built in range allows reduction of inventory.
- 4. Drop in track head bolts with stainless steel nuts allow assembly in either direction. Available with NEVERGALL coating.
- 5. 360° complete full circle mat o-ring gasket provides protection against leaks beyond o-ring seal.
- 6. The branch shall be a minimum of 3/8" larger diameter than nominal to allow the use of a full size cutter.
- 7. Can be custom built for any pipe OD within limits.
