

Scope

The intent of the specification is to receive Valve Box Aligners for valves in sizes 4” diameter and up, designed to support, center and align the valve boxes on top of buried valves. The supplied Valve Box Aligners furnished shall be equivalent to the Model 5000 as manufactured by PowerSeal Pipeline Products Corporation.

Valve Box Aligner Specification

All valve boxes installed on valves should be done utilizing a PowerSeal Model 5000 Valve Box Aligner or an approved equal. The aligner is to be installed in place of wood blocking. The Valve Box Aligner shall be ¼” steel per ASTM A36 with a ¾” SBR protective gasket permanently attached to the adapter at the factory. The aligner will be supplied with an epoxy finish.

- BODY:** ¼” Steel per ASTM A36
- FINISH:** Standard protective epoxy coating
- GASKET:** Standard ¾” thick SBR protective gasket Permanently bonded to the body at the factory.
